

TTM - Time Temperature Module

New

The core competences of PWM relate to price signs and their supplementary products. In addition to the complete solutions, price change units and the customised solutions, we offer our customers profitboards and time/temperature modules.

An additional highlight for your monolith The Time Temperature Module offers a key orientation point, with many hundreds of visual contacts per day. Thanks to the high attraction level as a desired information point, your entire price display is viewed more frequently. You can change between temperature, date and time.

Overview of the advantages:

- / Simple installation and use
- / Low energy consumption
- / Retrofits are always possible
- / Standalone or built-in versions
- / Key orientation point
- / High level of attention
- / Maintenance-free

These are your benefits:

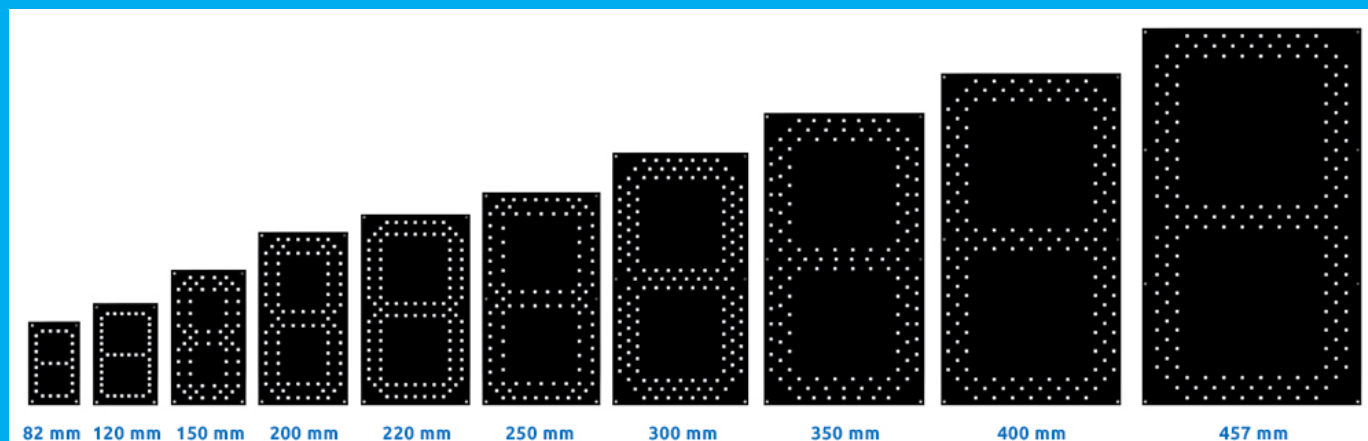

- / unsurpassed light quality
- / increased viewing angle
- / extremely flat design
- / significant energy savings
- / flexible system easy to retrofit
- / IP 67 water-proofed
- / low-reflection surface
- / good visibility at great distance
- / cost savings due to quick and easy installation

PWM development and production involve:

- / implementing customized designs
- / 3D construction
- / automated coating of all SMD modules
- / automated centre for profile processing
- / screen printing equipment
- / digital printing
- / punch press
- / 100% burn in test, conducted by our quality management team
- / individual letter assembly

All digit sizes available

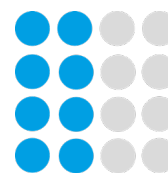

executions	
brightness (cd/m ²)	>6000
colours	white, red, green, yellow, orange
